Security Alarm Setup
Opening Cover & Installing Battery

To open your skyvue alarm use the factory set combination 0-0-0.

After setting the combination push forward on the snap to lift the cover to expose the combination tool and battery compartment.

Remove the tool and insert a 9-volt battery into the compartment.

Setting Your Own Combination

1. Insert the combination tool into the right side of the unit and then down into the three corresponding holes.
   Hold the tool down and push to the left until it stops.

2. Hold the tool in position and rotate the dials one at a time to your own combination. Make sure all numbers are centered in the window.

3. Release the tool but do not remove it. Move the dials to ensure your combination is engaged before removing the tool.

   Note: The cover will not open or shut unless your combination is dialed in. Attempting to force the cover shut may cause damage to the device.

   REMEMBER YOUR NEW COMBINATION AND WRITE IT DOWN!
Operating your SkyVue Alarm

The SkyVue alarm is designed to help protect your personal property and yourself using different “snap-in” adapters. The adapters snap into the SkyVue alarm as illustrated below.

NOTE: You cannot insert or remove the adapters with the cover shut and locked.

Alarm Test: You can test the alarm by inserting one pin of the adapter into the left side pin hole. The alarm should sound and flash.

Your SkyVue alarm has three light settings.
1. “OFF” for no lights.
2. “WARNING” will turn on the slow blinking light which shows the alarm is armed
3. “FLASHER” will activate the pulsating safety flashers.
Alarm Installation

1. Wrap the security wire through the mounting plate and post.

2. Wrap the security wire between arms and the back of the television.

3. After wrapping the security wire between the arms, cross the wire through the Anti-Theft Anchor Point located in the back lower corner of your television as shown below.

NOTE: This is shown with a post mount however we use the same tilt bracket for multiple installations including the ceiling mount.
4. Lock the security wires in place by connecting and close the alarm as shown.

Congratulations you have succesfully installed your SkyVue Security Alarm. If you have questions feel free to contact our technical support team (877) 475-9883
